MANNAM GNANAPRAKASH

JAVA BACKEND DEVELOPER | SPRING BOOT

8019603919 | prakashmannam8@gmail.com | Ongole, Andhra Pradesh

LinkedIn | GitHub | Codolio

EDUCATION

QIS College of Engineering and Technology — Ongole, Andhra Pradesh
B.Tech in Computer Science and Engineering — 2023 – 2027

TECHNICAL SKILLS

Languages: Java 21, SQL, JavaScript
Backend: Spring Boot 3, Spring Security 6, Spring Data JPA, Hibernate, REST, JWT
Testing: JUnit 5, Mockito, MockMvc, H2
Systems: TCP Sockets, Multithreading, Thread Pools, ConcurrentHashMap
Tools: Git, GitHub Actions, Docker, Maven, Swagger/OpenAPI, Postman, Railway
Core CS: Data Structures & Algorithms, OOP, DBMS

PROJECTS

Campus Coders

Live | GitHub | API Docs

Java 21 • Spring Boot 3 • Spring Security • JWT • MySQL • JPA • JUnit 5 • Docker • React

- Architected a production backend with **30+ REST endpoints** for auth, learning paths, discussions, daily challenges, notifications, bookmarks, and role-based ADMIN/STUDENT dashboards.
- Implemented stateless **JWT authentication** with **Spring Security 6**, including BCrypt hashing, RBAC, email OTP verification, and password reset via the Brevo HTTPS API.
- Modeled **19 entities** in **MySQL** with Spring Data JPA/Hibernate, optimizing indexes, cascades, and DDL validation profiles for production.
- Wrote **73 automated tests** using JUnit 5, Mockito, and @WebMvcTest; built **GitHub Actions CI/CD** with H2 test isolation to validate changes before deployment.
- Integrated **Swagger UI** (OpenAPI 3) with JWT bearer authentication and deployed the application using multi-stage **Docker** on Railway Cloud.

MiniRedis

GitHub

Java • TCP Sockets • RESP • Thread Pools • ConcurrentHashMap

- Engineered a Redis-compatible in-memory data store in pure **Java**, parsing raw **RESP** (REdis Serialization Protocol) commands over **TCP sockets**.
- Built a highly concurrent server using **ExecutorService** thread pools and **ConcurrentHashMap** to ensure thread-safe, non-blocking access for simultaneous clients.
- Implemented an **O(1) LRU** eviction policy (HashMap + Doubly Linked List) with **TTL** key expiration, and designed an asynchronous snapshot persistence layer for crash recovery.

EXPERIENCE

Java Full Stack Developer Intern — Apr 2026 – Jun 2026
EduSkills (AICTE Virtual Internship) — Virtual

- Built Spring Boot REST services with MySQL persistence following controller–service–repository architecture across a 10-week industry-aligned AICTE program.
- Implemented request validation, exception handling, and Postman-based API testing across multiple CRUD modules.

ACHIEVEMENTS

- Solved **900+** DSA problems across LeetCode, CodeChef, and HackerRank; maintained a **120+ day** streak and participated in **30+** contests.
